PROFESSIONAL SUMMARY

Full-stack application developer with 4 years of experience building web applications with JavaScript/TypeScript, Python, PHP, Node.js, React, and SQL (MySQL). Experienced in backend development, REST APIs, SSO, database-driven features, major application migrations, configurable platforms, and production support. Additional exposure to data analysis with Python dashboards and AI integrations using LLM APIs.

CORE SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS

Frontend: React, Next.js, Astro, Redux, Zustand, Tailwind CSS, Zod

Backend: Node.js, PHP (Symfony/Laravel), Python (Django), REST APIs, SSO, local-deployment systems

Data/BI: MySQL, PostgreSQL, MongoDB, Pandas, NumPy, Jupyter

Other: LLM APIs, Docker, GitHub Actions, Jest, PyTest, AWS (basic), Git/GitHub, Scrum, n8n, MCP

PROFESSIONAL EXPERIENCE

Vierge Group Backend Developer | February 2026 - Present

- Contributed to backend development for a locally installed point-of-sale (POS) system.
- Helped support local installation requirements and backend workflows for in-store sales operations.
- Contributed in the design of the application (Frontend)

PSL Group Junior Application Developer | Jun 2022 – February 2026

- Built a domain-based SSO feature that allows B2B clients to access the platform through their own domain.
- Supported a full application migration to a newer major version; resolved compatibility issues and stabilized production builds.
- Implemented a configuration framework using settings and feature flags to make site behavior configurable and reduce recurring code changes.
- Redesigned premium-account provisioning by updating database tables and roles, replacing a cron-based flow with a database-driven process.
- Created Python dashboards and prototyped an LLM-API-based chat experience to explore data analysis and AI-assisted workflows.

PSL Group Application Developer Intern | Jan 2022 - Jun 2022

- Delivered full-stack enhancements and bug fixes across application features, database updates, and API integrations.
- Practiced Git workflows, code reviews, and Agile/Scrum collaboration in a production software environment.

COMMUNITY & LEADERSHIP

GDG Atizapán Community Contributor / Organizer | Jun 2023 - Present

- Co-organize developer meetups and share educational content on web development and software engineering.

EDUCATION

Universidad Autónoma del Estado de México B.Eng. Computer Engineering | 2017 - 2022 | Professional License: 14866452

Platzi Web Development | 2020 - Present

LANGUAGES

Spanish (Native); English (Conversational)

Hobbies

- Listening to Music (Classic Rock)
- Playing video games
- Working out
